
a
Target cell production rate (λ)
Viral infectivity (β)
Time to reactivation (t_a)
Viral load (log10 copies/mL)
Time (days)
high
low
b
Relative sensitivity of viral load to parameter
λ
β
t_a
Time from reactivation (days)
c
Immune memory production rate (m)
Immune proliferation rate (p)
Immune avidity (N_p)
Viral load (log10 copies/mL)
Time (days)
high
low
d
Relative sensitivity of viral load to parameter
m
p
N_p
Time from reactivation (days)
